MEMO - September 2026 AR close, Clara Servicios MX

To: Controller | From: Diego Verduzco, Mexico accounting | Prepared as of: 1 October 2026 (September close)

1. Headline results (MXN)

- **Closing AR, corrected:** 1,759,932.85 (opening 2,062,254.96). Current 1,458,332.85; 1-30 days 301,600.00; nothing over 30 days.
- **Cash application:** 9 receipts applied to 10 invoices (AR relieved 2,061,209.44), including a credit note, a partial, a short and a cross-currency payment; 34,800.00 unidentified, held in 2101. Payroll and a supplier payment are not AR.
- **IVA:** trasladado cobrado 247,757.23 (cash basis, at the FIX of each collection date as the case instructs); closing IVA por trasladar 140,653.43 at booked rates (at the closing FIX it would be 240.41 higher; not booked, it settles at the FIX of collection).
- **FX:** realized -3,258.50 (receivables -3,806.02, IVA reclassification 547.52); unrealized on open USD balances 4,545.51.
- **Ledger:** 27 proposed entries, all balanced; 2 are conditional on tax/ledger confirmation. 17 exceptions logged (9 high).

2. The three issues to worry about

- **Payments without REP.** 5 September payments on invoices A-1002, A-1010, A-1013, A-1006, A-1015 have no Complemento de Pago (IVA collected 134,351.15). The REP is due by the 5th calendar day of the following month (RMF 2026 rule 2.7.1.32): 05 Oct 2026. A-1006, A-1013, A-1015 were applied oldest first because receipts B12, B13 named no invoice; AR confirms with the customers before those REPs are stamped.
- **PUE invoice not collected.** A-1008 (232,000.00) was stamped as paid in one exhibition (PUE) but no cash arrived. SAT sees it as paid while our books and aging show it open; the customer may credit its IVA only when it pays (LIVA art. 5o fr. III). It must be cancelled and reissued as PPD with payment form 99 (RMF 2026 rule 2.7.1.39).
- **Billing quality.** A-1012 billed at 0% IVA to a Mexican customer (exposure 48,000.00); A-1013 booked at its CFDI rate, not the FIX: the CFDI is valid, the books need a conditional correction of 7,656.00; A-1010, A-1011 look like duplicates (87,000.00 each); A-1016 is cancelled at SAT but was booked (52,200.00).

3. Compliance actions

Action	Owner	By
Issue and stamp the 5 missing REPs (A-1002, A-1010, A-1013, A-1006, A-1015); for A-1006, A-1013, A-1015, after the customers confirm the invoice.	Tax team	05 Oct 2026
B12: ask the customer which invoice it paid; if it names a newer one, reassign the receipt before the REP.	AR analyst	04 Oct 2026
B13: ask the customer which invoice it paid; if it names a newer one, reassign the receipt before the REP.	AR analyst	05 Oct 2026
A-1008: Confirm with the customer that it is unpaid; then cancel it and issue a new CFDI with method PPD and payment form 99, related as 'Sustitución de los CFDI previos' (c_TipoRelacion 04), and issue the REP when the cash arrives (RMF 2026 rule 2.7.1.39). If it was paid, locate the cash. The date is an internal deadline: the rule sets none.	Tax team	03 Oct 2026
A-1012: Tax team to confirm whether any exemption or 0% treatment applies; if not, cancel and reissue with 16% and the customer's acceptance.	Tax team	05 Oct 2026
A-1013: approve or reject the conditional rate correction; reissuing the CFDI is optional.	Controller	05 Oct 2026
A-1010, A-1011: Account manager to confirm whether the service was delivered twice; if not, cancel A-1011 (no cash received) and reverse its entry.	Account manager	03 Oct 2026
B08: Treasury to get the payer's name and RFC from the bank; AR to contact the customer. If it pays Clara services, apply it (or issue the advance CFDI) and include its IVA in this month's return, due 2026-10-17 (LIVA art. 5o.-D); if mistaken, refund it (no IVA). Tax team decides by 2026-10-15 if it is still unidentified.	Treasury	03 Oct 2026

4. Standards and laws applied

- **IFRS:** IFRS 9 (receivables at amortized cost; the simplified expected-credit-loss approach needs a provision matrix built on loss history, which the data does not include, so no allowance is proposed here; A-1008 and A-1003 should feed it); IFRS 15 (the credit note reduces revenue); IAS 21, as generally applied and to be confirmed against the full standard (USD items at the transaction-date rate, monetary balances revalued at the closing FIX, differences in P&L; realized vs. unrealized split). Opening USD balances were not revalued at 31-Aug (immaterial): left inside September's FX unless the Controller books an out-of-period adjustment.
- **Mexican tax:** LIVA arts. 1o.-B and 17 (IVA on services is due when cash is effectively collected, advances included) and art. 5o fr. III (the customer credits IVA only once it is paid); LIVA art. 1o (16% general rate) and art. 29 fr. IV (0% only for qualifying exports of services); RMF 2026 rule 2.7.1.32 (REP by the 5th calendar day of the following month) and rule 2.7.1.39 (a PUE not paid by the end of its month is cancelled and replaced by a PPD/99 CFDI related as a substitution, key 04 in Anexo 20); Anexo 20 (TipoCambio is required for USD; using the FIX is optional, and a rate more than 35% off needs a confirmation key). Items marked 'to confirm' go to the tax team before posting.

Detail, source rows and every entry: Part A workbook. The same numbers are produced by the Part B tool.
